TECHNICAL SKILLS

- *Programming Languages:* Java, Python, C, C#, F#, JavaScript, React, HTML
- *Libraries & Frameworks*: Pytorch, Tensorflow
- *CAD*: Unity, SolidWorks, Onshape, Omax Layout, KiCad, BrickLink Studio
- *Other Tools*: GitHub, GIMP, Figma, Canva, Soldering, 3D printing

EXPERIENCE

Computer Science Research Assistant, Northeastern University *June 2025 – June 2026*

- *Transfer Project*: Researched systemic inefficiencies in CS transfer pipelines and designed modular “micro-bridge” courses to reduce credit loss, tracked progression of pilot courses
- *AI Curriculum Mapping Project:* Project aimed to track AI education landscape, started creating validation datasets to ensure accuracy of extracted information and later expanded into an engineering role, refining automated link and curriculum scraping process: https://cicmap.ai/

Computer Science Thesis, Williams College *September 2024 – May 2025*

- Built a browser-based simultaneous interpretation platform (React, Node.js, WebSockets) replacing $4,700+ hardware with software running on a phone/laptop + $5 headphones
- Conducted interpreter needfinding and iterative prototyping; validated via live bilingual user studies and cost/scalability analysis

Geospatial AI Researcher, DREU, University of Florida *June 2024 – August 2024*

- Developed accessible learning tools for high school educators, focusing on mapping the impact of coastal storms.
- Utilized Google Colab to create educational modules integrating written and visual content with coding examples.

Computer Science Education Researcher, Williams College *Summer 2022 & 2023*

- Designed a computational thinking curriculum for sixth graders, enabling them to build and code their own LEGO robots.
- Led a week-long coding camp for 5th and 6th grade girls, fostering an interest in technology.

Web Development Intern, Education Without Limits *January 2023 – June 2023*

- Developed a prototype online education platform using React and JavaScript.
- Implemented features for educators to browse curated resources and customize lesson plans with inclusivity and user-friendliness in mind.

Teaching Assistant, Williams College *January 2023 – May 2025*

- Led help hours for Programming Languages and Data Science & Computing For All.

EDUCATION

Williams College, Williamstown, MA *January 2023 – May 2025*

Honors B.A. in Computer Science, B.A. in Women's, Gender & Sexuality Studies

- *GPA:* 3.73 | *Dean's List:* 2022-25 | Sigma Xi Scholar
- *Coursework*: Human-Computer Interaction, Machine Learning, Algorithms, Computer Organization, Game Development, Programming Languages
- *Activities*: Youth Assistant Lacrosse and Soccer Coach, Animal Shelter Volunteer, Williams Commencement & Alumni Reunion Ranger, Underrepresented Identities in Computer Science Member

University of Waterloo, Waterloo, ON *September 2026 – Present*

Ph.D. in Human-Computer Interaction

- *Advisor:* Prof. Edith Law | HCI Lab, Faculty of Mathematics
- *Research Focus*: HCI and computer science education, AI's role in widening or narrowing access to CS, accessible technology
- *Teaching*: Teaching Assistant for CS 135: Designing Functional Programs
